

Logistics Hubs

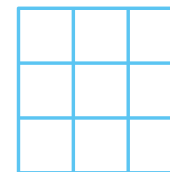

Do I have the right space for an urban logistics hub?

Location

Needs to be near Transport for London Road Network for easy vehicle access. Ideally not inside any one-way systems.

Space

Floorspace of $>280\text{m}^2$ (3000ft²), but ideally between 465-930m² (5,000-10,000ft²) and as much headroom as possible.

Access

Needs height of more than 3m for access. Standard operating hours: 8.00 - 18.00.

Contract

Longer lease period of 5+ years preferable.

Other Information

Electric vehicle charging points may be necessary depending on vehicles in use.

Security

CCTV required to protect goods, assets and staff. In shared locations, individual secure spaces are required.
