Clean Air Village Solution

[Cross River Partnership](#) is excited to be working with [Angel BID](#) this year as part of the [Clean Air Villages](#) project. Together, we aim to deliver an employee active travel programme for those part of the BID, developing activities that benefit both businesses and their employees on their commute to work. The programme will to help increase active transport (cycling and walking) in the area and cut down on traffic from deliveries and services. This will lead up to the active travel challenge month which is in February where participants will be given a series of challenges to complete, all for the benefit of a healthier and more sustainable community in The Angel.

If you would like to know more about this project and how we can help you and your employees, please answer this short [survey about your typical commute to work](#) or contact our local lead, Anusha directly via email or phone.
