Clean Air Village Solution

London's South Bank is an iconic area of the city. From the London Eye to the South Bank Centre and the home of the British Film Institute, this central hub is popular for locals and visitors alike. The area along South Bank, including Waterloo station, has been designated an Air Quality Focus area, where air pollution and population density are both high.

The [Cross River Partnership](#) Team is working with [South Bank BID](#) on an employee engagement programme, as part of the [Clean Air Villages](#) project, to help increase active transport (cycling and walking) in the area and cut down on traffic from deliveries and services.

If you're a business located in and around the South Bank and want to know more about the programme, get in touch!
