Clean Air Village Solution

[Cross River Partnership](#) (CRP) is excited to continue working with the [London Borough of Lambeth](#) for a third year, as part of the [Clean Air Villages](#) (CAV) project. This year's focus area for Lambeth is a new one to CAV and the CRP team is excited to welcome local hospitals and health practices to the programme.

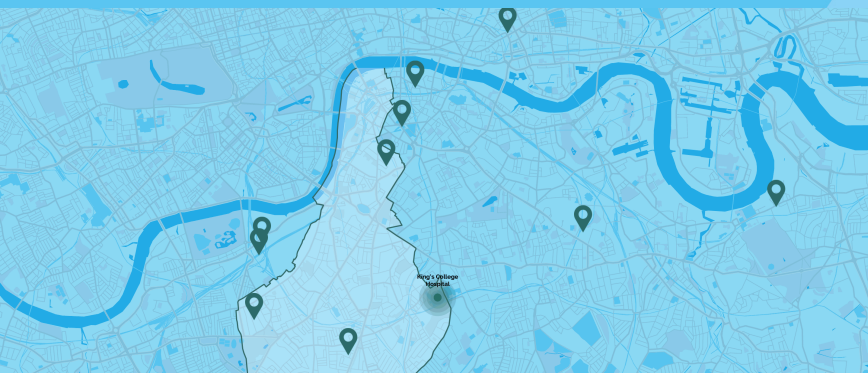

One of the main partners for this year's project is [King's College Hospital](#), located on Denmark Hill. There are many air quality areas of interest surrounding the hospital, but there was a real desire from the hospital community to gain more information on local air quality. This inspired the local solution of a Citizen Science Air Quality Monitoring Project, where hospital staff have been trained to conduct a nitrogen dioxide monitoring study, data which we hope will help pave the way for future air quality improvement initiatives in the area.
