**CROSS RIVER
PARTNERSHIP**
Delivering London's Future Together

CRP Supports Property X-Change

CRP has been working with the [Mayor of London](#) as one of the founding partners of the recently launched Property X-Change!

The Property X-Change forms part of the [London Recovery Programme](#) and aims to encourage thriving high streets for all. It's mission is to create an open platform for knowledge exchange, a diverse network of high street champions, and a bright future for London's high streets.

CRP attended the launch of the Property X-Change at City Hall, where 15 panellists took on the challenge of responding to a variety of prompts related to our high streets.

The event also celebrated the launch of the [Property X-Change website](#), which provides information on how to discover and engage with inspiring stories about high street regeneration and development.

For more information, please contact CRP Programme Manager Fiona Coull - fionacoull@crossriverpartnership.org.

River Freight Pilot Launch

CRP is excited to launch a river freight pilot along the River Thames as part of the Defra-funded [Clean Air Villages 4](#) project on Tuesday 26th July.

CRP is working with the [Port of London Authority](#), [The Northbank BID](#), [GPS Marine, Complete](#), [iRecycle](#), [Mayflower](#), [Antalis](#) and London's pier owners.

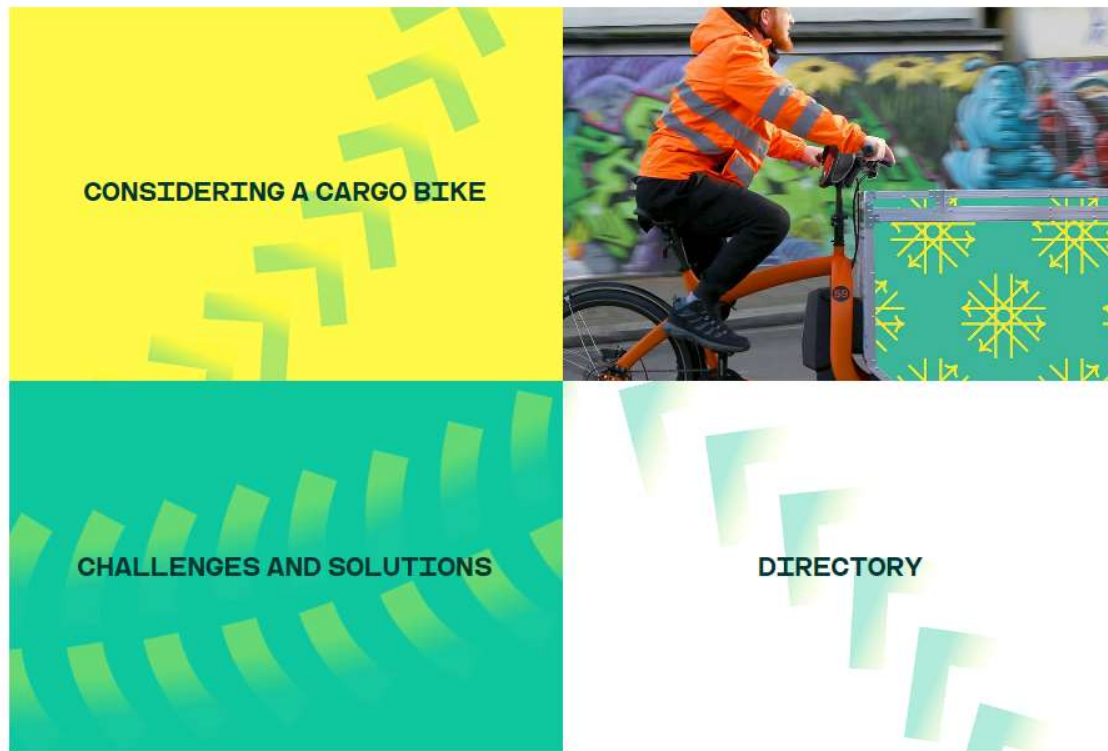

Businesses in The Northbank BID and surrounding areas are being invited to order office and cleaning suppliers from participating suppliers during a six-week pilot period. Goods will travel down the Thames from Dartford and Woolwich, arriving into Woods Quay, located on Embankment, next to Waterloo Bridge. Woods Quay is helping with the trial 'out of hours'. Through this pilot, businesses and suppliers will work together to consolidate deliveries, helping London's economy and freight industry.

For more information, please contact CRP Project Manager Kate Fenton - katefenton@crossriverpartnership.org.

Business Cargo Bike Guide!

BUSINESS CARGO BIKE GUIDE

CRP is pleased to launch [Business Cargo Bike Guide](#), a resource for London businesses looking for information on cargo bikes. We've populated the site with useful (and easily digestible) information on points to consider before getting a cargo bike, types of cargo bike, operating and maintaining them, and more.

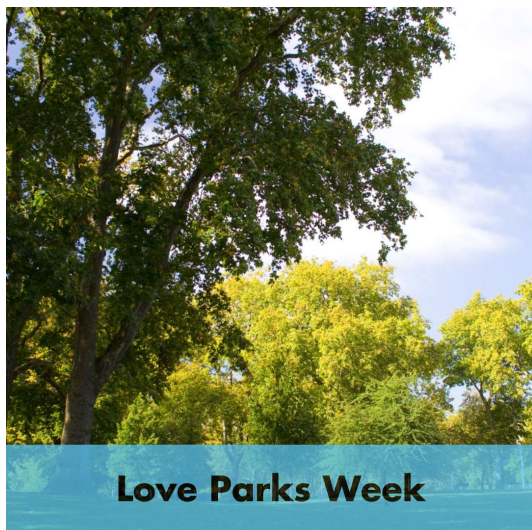

Businesses are being encouraged to switch to zero or low emission transport, to help mitigate climate change and improve air quality. Cargo bikes are a less expensive, more reliable option for businesses making local deliveries.

A critical barrier to businesses using cargo bikes is a lack of knowledge about them. There is a need for guidance specifically geared toward businesses rather than for personal use. Existing knowledge is fragmented across the internet, and SMEs often don't have the time to research this information. Businesses may also be in a position where they've purchased a cargo bike but have limited knowledge about getting the best out of them and perhaps underusing or misusing them.

CRP has worked with Business Improvement District and Local Authority partners on cargo bike share schemes across London. We've also researched related topics such as bike infrastructure and support active travel. We've distilled our experience into useful information and included a directory of related services to give businesses what they need to get the best out of cargo bikes.

For more information, please contact CRP Project Manager Sefinat Otaru - sefinatotaru@crossriverpartnership.org.

National Sustainability Awards 2022

**NATIONAL
SUSTAINABILITY
AWARDS
2022**

SHORTLISTED

We are pleased that [Electric Vehicle Fleet-Centred Local Energy System \(EFLES\)](#) has been [shortlisted](#) for the [National Sustainability Awards](#)! CRP has been shortlisted for 'Major Project of the Year' and 'Low Carbon Transport Initiative of the Year', alongside project partners UK Power Networks Services, UPS and Moixa.

We look forward to hearing the outcome soon!

Vivacity Monitoring Complete

CRP has completed another three months of [data analysis and monitoring services](#) for traffic and movement data for CRP Board and project partner [South Bank BID](#). This continues to support South Bank BID with its public realm evidence-based decision-making across the area around some of London's top landmarks, tourist attractions and hospitality centres.

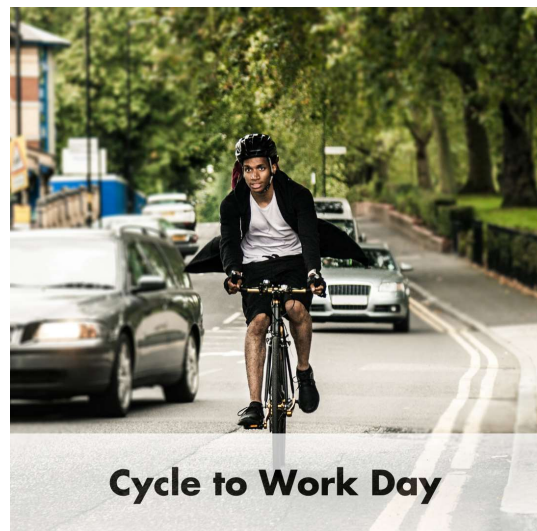

CRP has been analysing data collected by five traffic sensors across the BID area, supplied by [VivaCity](#), that collect traffic data using artificial intelligence and machine learning. The sensors collect live traffic count data from pedestrians and cyclists, all the way up to cars, vans, buses and lorries, and give a detailed insight into how the area is used each day. CRP's most recent data analysis period was from 1st April – 30th June this year.

CRP has been supporting South Bank BID with data analysis and monitoring services for two years to understand the movements of pedestrians, cyclists and motorised vehicles in the area, so that they can make the space as enjoyable and pedestrian friendly as possible.

If you would like to hear more about CRP's data analysis and monitoring services, please get in touch with CRP Sustainable Transport Manager Ross Phillips - rossphillips@crossriverpartnership.org
